

# Pain Stops Here

Stop suffering from foot, knee, hip, and back pain.  
Get back on your feet by getting back your arch!

- Restore function and health to your feet, knees, hips and low back.
- Reduce/eliminate heel pain, plantar fasciitis, bunion and forefoot pain, and reduce shock and pain in your knees, hips, and back.
- **Sole Supports™** are the only orthotics that are “custom calibrated” to flex for your body weight. Flexible enough for comfort, yet enough control to actually change foot function.
- Many college and professional athletes wear Sole Supports, since they maximize improvement to one’s posture, injury prevention, balance, and athletic performance.
